

# KÜMESLER

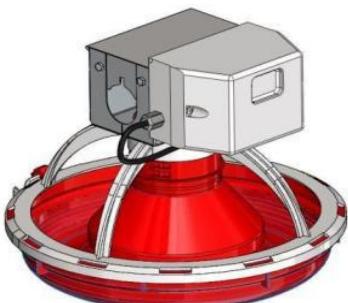

## SPİRAL YEMLİK ÇEŞİTLERİ VE ANA PARÇALARI

\*Pan Feeding Line Kemer 4

\*Tray Feeder

\*-MİD -Line Stopper KAL08

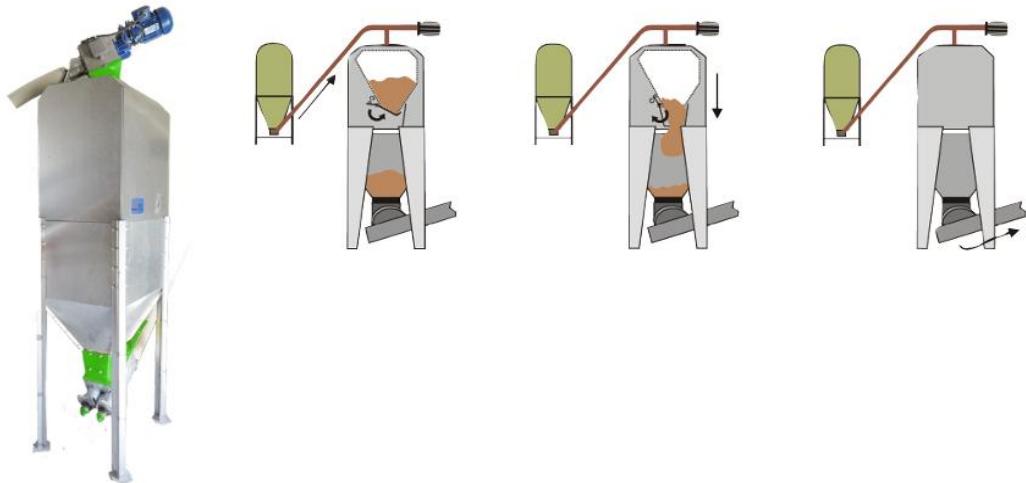

## Pan Feeding Lifting System

- \*Including pulleys, steel wires, suspension cords clamps for steel wire, suspension plates.
- \*System is designed for suspension at every 3 meter.
- \*Suspension cord length is calculated for 3 m. height and suspension plate for metal roof

## FEEDING SYSTEM

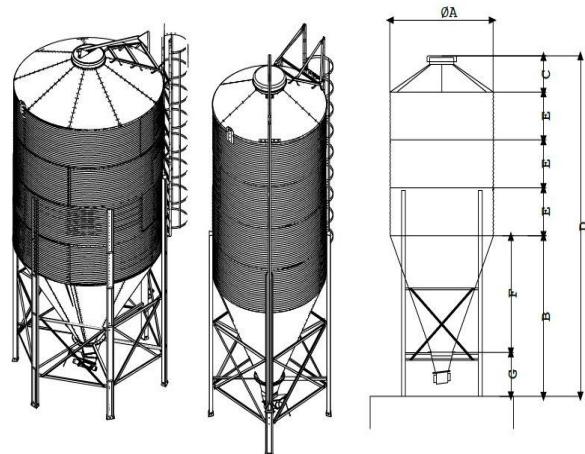

## Electronic Scale

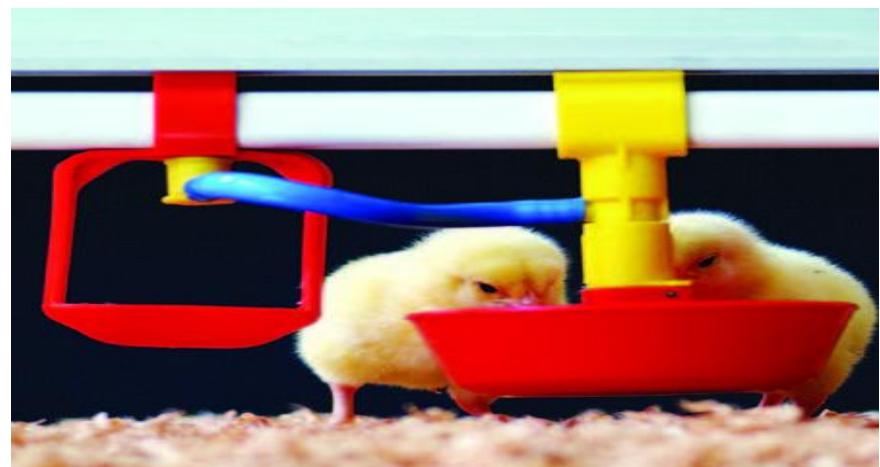

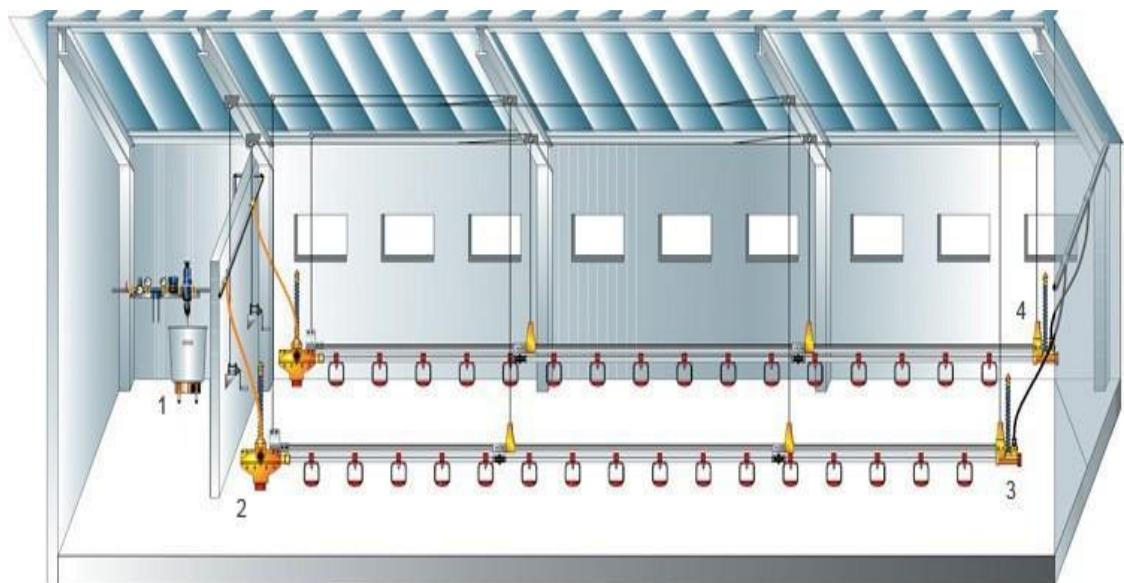

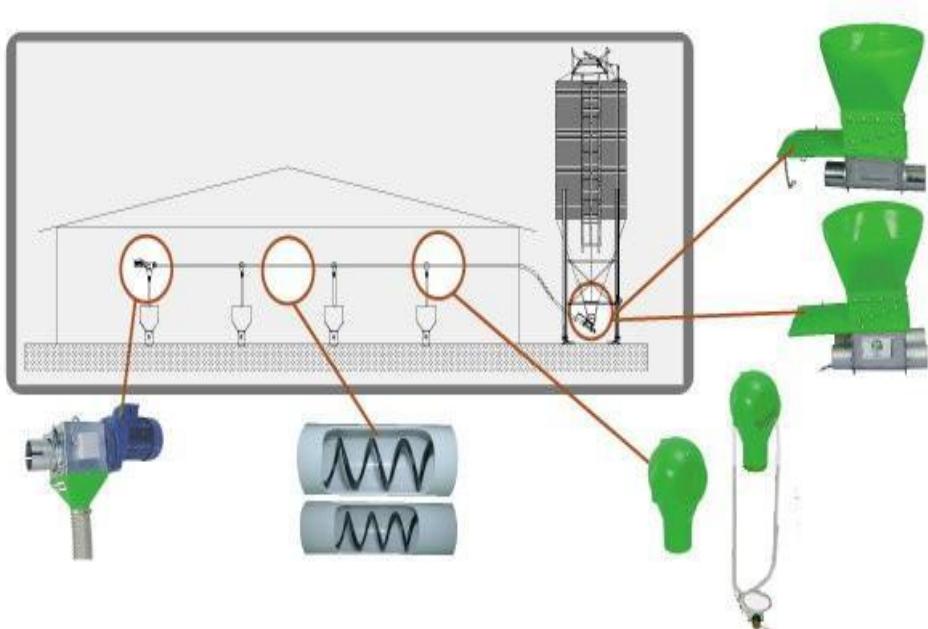

It is used to transfer the desired amount of feed to the feed hoppers inside the poultry house using automatic landing kits. The feed distribution program, which determines the desired amount and time to the desired hopper, is managed through the appropriate processor.

\* FEED SILO

# WATERING SYSTEM

The greatest feature of the nipple, which can provide a water flow rate of 30-40 cm<sup>3</sup>/min horizontally and 70-80 cm<sup>3</sup>/min vertically in a 20 cm water column, is that it can be manufactured from high-quality steel. As an alternative to steel nipples, "plastic nipples" can also be used in nipple irrigation units.

## Advantages

- \*It provides access to water from day-old chicks until slaughter.
- \*It provides a constant supply of fresh and clean water.
- \*It makes maintenance and cleaning easier.
- \*It keeps the poultry litter dry.
- \*It helps to raise all living things in a balanced and equal way.
